• Electronic communications during depositions	5 minutes
• Online repositories	5 minutes
Ethical considerations of service providers	5 minutes
Summary	5 minutes

Lexitas Provides CLE on the Ethics of Deposition Technology

Philadelphia, Pa., May 25 /PRNewswire/ -- Lexitas, a provider of deposition services, is pleased to present their CLE presentation on “the Ethics of Deposition Technology.” This presentation, which has been approved for ethics credit in several states has already received very positive feedback from recipients.

The presentation begins with a discussion of the attorneys’ responsibilities under the ABA Rules of Professional Conduct, then addresses the benefits and ethical considerations of various technologies such as videotaped depositions, realtime (both local and Internet), remotely-conducted depositions, electronic communications during depositions, online repositories, and social media.

“Demand for this presentation has been quite strong,” said Terry Mogul, CEO of the Insurance Society, which facilitates CLE presentations for many law firms around Philadelphia. “The feedback has been quite positive, and many of the litigators have indicated that the material and associated case law will make a positive impact on their practice.”

Many other firms have already expressed interest in having this presentation for their staff.

“Lexitas’ CLE on the Ethics of Deposition Technology was a hit at our firm,” said Anthony J. Iannini of Saul Ewing LLP. The attendees were very impressed with the content and its presentation. We are committed to understanding all of the strategic value – and ethical issues – in litigation technology.”

These topics are quite relevant for Lexitas, as many of these services are offered to their clients. In particular, Lexitas offers a market-leading LegalView deposition service which improves the effectiveness of the attorneys while removing inefficiencies and unnecessary costs inherent in the traditional way of conducting depositions and arbitrations.

Lexitas provides the added value of a web-based video and transcript from the proceeding. Lexitas sends technicians to the deposition to swear in the witness, scan the exhibits, and manage the audio/video connections at no charge. Using this process, remote attorneys, claims adjustors, and clients can easily participate in the proceedings as they happen. Lexitas makes the videos of these depositions available within 24 hours on LexitasNG.com and stores the video online with the associated transcripts and linked exhibits.
