

## LEGAL|VIEW<sup>SM</sup>

Lexitas, the global leader in remote depositions, proudly offers **LegalView** — a unique remote viewing platform for depositions and trials worldwide.

LegalView delivers professional-grade video while providing a completely interactive or one-way viewing experience — all via computer or mobile device and fully compatible with traditional videoconferencing systems. Supported by Lexitas' world-class service and *patented* technologies, LegalView enables participants to be part of the action without ever leaving their office or home.

### EASE OF USE

The Internet and a computer or mobile device are all that you need.

### FLEXIBILITY

Connect anywhere to anywhere, regardless of hardware or device.

### UNLIMITED PARTICIPATION

Interact fully or view proceedings using our virtual "one-way mirror." Perfect for clients, co-counsel, experts and adjusters.

### LIVE 24/7 MONITORING

Lexitas' specialists monitor every minute of every LegalView deposition to ensure perfect quality.

### RAPID ACCESS REVIEW

Download or review the video online once the deposition ends.

### SECURITY & COMPLIANCE

Patented, military-grade encryption. Exceeds HIPAA technical safeguard standards.

*"Lexitas helps me serve my clients better. Rather than spend time and money to fly to every one of my depositions, I now choose which ones I want to attend and invite my clients to view all the depositions live or whenever the time is right for them."*

– Outside Counsel, Fortune 30 corporation

# LEGAL|VIEW

The Professional Choice for Reliable, Remote Testimony

## ADVANCED SECURITY:

- AES-128 bit media encryption SRTP for audio, video and shared content. Chat messages are transmitted over the secure signaling link.
- Secure HTTPS login utilizing industry standard PKI
- TLS using strong encryption ciphers for signaling
- Password hashing in database
- Component blocking for spoof prevention
- Encrypted token technology for session security
- No login information kept at the desktop

## FLEXIBLE, HIGH-DEFINITION VIDEO:

- Connect through computers, videoconferencing, mobile devices, and phones to the same event.
- Videos are recorded in a secure server as H.264 MP4 files using 832x468 resolution with 48-bit AAC audio and stored as encrypted files at rest.
- These videos which can be transcoded into any other video format, and synchronized with the transcript for use in presentation software such as Sanction or Trial Director.
- All LegalView events are monitored by trained staff in Lexitas Network Operations Center using patented monitoring technology.
- Scalable Video Coding (SVC) maximizes the quality over networks of all speeds.
- Video codecs enable connections from 50k/second to 50 MB/sec.
- Depending on bandwidth, video will stream as high as 1080p / 30 fps.

## NETWORK VIRTUALIZATION:

- LegalView has the ability to traverse firewalls, without compromising the integrity of the private network or requiring additional expensive equipment.
- With specific UDP ports opened on the network, LegalView uses industry standard ICE/STUN to negotiate UDP ports directly. These same protocols are employed for NAT traversal. If the ports cannot be opened, LegalView will tunnel on port 443 using industry standard TCP.
- LegalView will automatically detect if it is blocked by firewalls, and will automatically switch to configuration as needed. If the firewall configuration is known, auto-detection can be easily overridden.
